Bonus Lab Iterators and Linear Probing

Goal

In this lab, you will complete the implementation of a linear probing hash table and an iterator over a linked list.

Resources

- Chapter 13, Chapter 22, and Chapter 23

Java Files

- `HashLLDS.java`

Step 1. Complete the put() method
Step 2. Complete the resize() method
Step 3. Complete the Iterator definition and methods

Checkpoint: Run HashLLDS and compare your output vs. ExpectedOutput.txt

Post-Lab Follow-Up

Implement the remove() operation of the iterator.
